

NEWSLETTER OF MARCH 13, 2023 BRAVO AND THANK YOU!

Dear Members,

On March 12, 2020, I was in Quebec City meeting with the ministry to discuss your working conditions and the changes to be made to the Working Conditions Regulation when I learned that the government and public health were going to decree the emergency measures because of a global pandemic, that we were going to have to find ourselves in confinement.

I remember my colleague who told me that we would see each other again in a month in person in Quebec City...

Over the past three (3) years, you have put the citizens of Quebec and the sick first, to the detriment of your health, your family, and your personal life. You left a part of yourself in the process, memories and scars will remain.

At APER, we have been privileged witnesses to your involvement, dedication, and commitment to ensure that services were provided to the population during an unprecedented global crisis. We are no longer the same and the privilege of seeing you in action has only increased the admiration we have for you...and the frustration of how the government has treated you and is treating you!

APER sent a letter to Prime Minister Legault so that today, the government and all of the deputies and ministers adopt a motion of congratulations for all of the personnel of the health and social services network, including managers. It seemed to us to be the minimum...

APER thanks you and congratulates you on this extraordinary and incredible job in an impossible context. You did it, be proud!
