

**PRESS RELEASE – Health Status of Managers of the Health and Social services  
Summary of the training of October 24, 2024**

October 29, 2024

Dear Members,

Before our general assembly on October 24, **Mr. Francis Maisonneuve, M.Sc., PhD candidate in organizational behaviour and human resources**, Affiliated with the HEC Montréal Health Hub and Lecturer, Department of Human Resources Management, gave us a preliminary overview of his research results for his PhD, which focuses on the health status of middle managers in the health and social services network

The preliminary results that Francis has given us are not at all surprising, and we could add to these results, the stress and anxiety generated by a new reform.

We are sending you the powerpoint of Francis Maisonneuve's training with this Newsletter.

If you haven't already completed the survey for Francis' research, there's still time to do so:

Thank you for completing the questionnaire.
